

# Contents of volume 25

- No. 1 (pp 1-82) published October 1986  
 No. 2 (pp 83-174) published November 1986  
 No. 3 (pp 175-304) published December 1986  
 No. 4 (pp 305-398) published January 1987  
 No. 5 (pp 399-490) published February 1987  
 No. 6 (pp 491-594) published March 1987

## Mini-reviews

- Cordier J-L, Butsch BM, Birou B, von Stockar U: The relationship between elemental composition and heat of combustion of microbial biomass 305  
 Sleytr UB, Sára M: Ultrafiltration membranes with uniform pores from crystalline bacterial cell envelope layers 83

## Biotechnology

- Alexander NJ: Acetone stimulation of ethanol production from D-xylose by *Pachysolen tannophilus* 203  
 Bodie EA, Anderson TM, Goodman N, Schwartz RD: Propionic acid fermentation of ultra-high-temperature sterilized whey using mono- and mixed cultures 434  
 Ceen EG, Herrmann JPR, Dunnill P: Solvent damage during immobilised cell catalysis and its avoidance: studies of 11 $\alpha$ -hydroxylation of progesterone by *Aspergillus ochraceus* 491  
 Chen LF, Gong C-S: Continuous ethanol production using induced yeast aggregates 208  
 Datcheva V, Kamernitskii A, Vlahov R, Voishvillo N, Levi V, Reshetova I, Chernoburova E: Microbiological dehydrogenation of polyfunctional  $\Delta^5$ -3 $\beta$ -acetoxy steroids by *Corynebacterium mediolanum* strain B-964 14  
 Ducos JP, Pareilleux A: Effect of aeration rate and influence of pCO<sub>2</sub> in large-scale cultures of *Catharanthus roseus* cells 101  
 du Preez JC, Bosch M, Prior BA: Temperature profiles of growth and ethanol tolerance of the xylose-fermenting yeasts *Candida shehatae* and *Pichia stipitis* 521  
 Evans CT, Conrad D, Hanna K, Peterson W, Choma C, Misawa M: Novel stabilization of phenylalanine ammonia-lyase catalyst during bioconversion of trans-cinnamic acid to L-phenylalanine 399  
 Evans CT, Hanna K, Conrad D, Peterson W, Misawa M: Production of phenylalanine ammonia-lyase (PAL): isolation and evaluation of yeast strains suitable for commercial production of L-phenylalanine 406  
 Pages J, Mulard D, Rouquet J-J, Wilhelm, J-L: 2,3-Butanediol production from Jerusalem artichoke, *Helianthus tuberosus*, by *Bacillus polymyxa* ATCC 12321. Optimization of *k<sub>a</sub>* profile 197  
 Famelart M-H, Kobilinsky A, Bouillanne C, Desmazeaud MJ: Influence of temperature, pH and dissolved oxygen on growth of *Brevibacterium linens* in a fermentor 442  
 Fick M, Engasser J-M: The deflocculating effect of chloride salts (ions) on *Clostridium acetobutylicum* grown in continuous cultures 194  
 Freeman A, Lilly MD: The effect of water-miscible solvents on the  $\Delta^1$ -dehydrogenase activity of free and PAAH-entrapped *Arthrobacter simplex* 495  
 Frick C, Schügerl K: Continuous acetone-butanol production with free and immobilized *Clostridium acetobutylicum* 186  
 Fujii T, Ogawa T, Fukuda H: Isobutene production by *Rhodotorula minuta* 430  
 Garcia-Tabares F, Herraiz-Tomico T, Amat-Guerri F, Garcia Bilbao JL: Production of 3-indoleacetic acid and 3-indolelactic acid in *Azotobacter vinelandii* cultures supplemented with tryptophan 502  
 Glück M, Lingens F: Studies on the microbial production of theobromine and heteroxanthine from caffeine 334  
 Gommers PJF, Christoffels LP, Kuenen JG, Luyben KChAM: Gas-phase influence on the mixing in a fluidized bed bioreactor 1  
 Groot WJ, Luyben KChAM: In situ product recovery by adsorption in the butanol/isopropanol batch fermentation 29  
 Hummel W, Schmidt E, Wandrey C, Kula M-R: L-Phenylalanine dehydrogenase from *Brevibacterium* sp. for production of L-phenylalanine by reductive amination of phenylpyruvate 175  
 Ikediobi CO, Ibrahim S, Ogbonna AI: Linamarase from *Fusarium equiseti* 327  
 Jørgensen MH, Nikolajsen K: Mathematic model for lactic acid formation with *Streptococcus cremoris* from glucose 313  
 Kanzaki H, Nagasawa T, Yamada H: Highly efficient production of L-cystathionine from O-succinyl-L-homoserine and L-cysteine by *Streptomyces* cystathionine  $\gamma$ -lyase 97  
 Kanzaki H, Kobayashi M, Nagasawa T, Yamada H: Production of L-cystathionine using bacterial cystathionine  $\gamma$ -synthase 322  
 Kato N, Yamagami T, Shimao M, Sakazawa C: Regeneration of NAD(H) covalently bound to formate dehydrogenase with several second enzymes 415  
 Lenbury Y, Chiaranai C: Bifurcation analysis of a product inhibition model of a continuous fermentation process 532  
 Looten P, Blanchet D, Vandecasteele JP: The  $\beta$ -fructofuranosidase activities of a strain of *Clostridium acetobutylicum* grown on inulin 419  
 Marquet M, Uribelarrea JL, Huchencq A, Laneelle G, Goma G: Glutamate excretion by *Corynebacterium glutamicum*: a study of glutamate accumulation during a fermentation course 220  
 Mitard A, Riba JP: Rheological properties of *Aspergillus niger* pellet suspensions 245  
 Morin A, Hummel W, Kula M-R: Production of Hydantoinase from *Pseudomonas fluorescens* strain DSM 84 91  
 Mozaffar Z, Nakanishi K, Matsuno R: Continuous production of galacto-oligosaccharides from lactose using immobilized  $\beta$ -galactosidase from *Bacillus circulans* 224  
 Mozaffar Z, Nakanishi K, Matsuno R: Mechanism for reversible inactivation of immobilized  $\beta$ -galactosidase from *Bacillus circulans* during continuous production of galacto-oligosaccharides 229  
 Mozaffar Z, Nakanishi K, Matsuno R: Effect of glutaraldehyde on oligosaccharide production by  $\beta$ -galactosidase from *Bacillus circulans* 426  
 Müller RH, Sysoev OV, Babel W: Use of formate gradients for improving biomass yield of *Pichia pinus* growing continuously on methanol 238  
 Nicolas L, Dossou-Yovo J, Hougard J-M: Persistence and recycling of *Bacillus sphaericus* 2362 spores in *Culex quinquefasciatus* breeding sites in West Africa 341  
 Parkkinen E: Conversion of starch into ethanol by *Clostridium thermohydrosulfuricum* 213

- Rolz C, de Leon R, de Arriola MC, de Cabrera S: White-rot fungal growth on sugarcane lignocellulosic residue 535
- Seigle-Murandi F, Steiman R, Chapelle F, Duc CL: 5-Hydroxylation of benzimidazole by micromycetes II. Optimisation of production with *Absidia spinosa* 8
- Sharma HSS: Comparative study of the degradation of flax shive by strains of *Pleurotus* 542
- Shieh W-J, Chen L-F: Effect of inoculum on yeast cell aggregation 232
- Sidler W, Kumpf B, Peterhans B, Zuber H: A neutral proteinase produced by *Bacillus cereus* with high sequence homology to thermolysin: Production, isolation and characterization 18
- Soni BK, Soucaille P, Goma G: Continuous acetone-butanol fermentation: a global approach for the improvement in the solvent productivity in synthetic medium 317
- Stevnsborg N, Lawford HG: Performance assessment of two patent strains of *Zymomonas mobilis* in batch and continuous fermentations 106
- Stevnsborg N, Lawford HG, Martin N, Beveridge T: Effect of growth temperature on the morphology and performance of *Zymomonas mobilis* ATCC 29191 in batch and continuous culture 116
- Suzuki T, Yamane T, Shimizu S: Mass production of thio-strepton by fed-batch culture of *Streptomyces laurentii* with pH-stat modal feeding of multi-substrate 526
- Taniguchi M, Kotani N, Kobayashi T: High concentration cultivation of *Bifidobacterium longum* in fermenter with cross-flow filtration 438
- Tan LUL, Yu EKC, Campbell N, Saddler JN: Column cellulose hydrolysis reactor: An efficient cellulose hydrolysis reactor with continuous cellulase recycling 250
- Tan LUL, Yu EKC, Mayers P, Saddler JN: Column cellulose hydrolysis reactor: cellulase adsorption profile 256
- Yeoh HH, Tan TK, Koh SK: Kinetic Properties of  $\beta$ -glucosidase from *Aspergillus oryzae* 25
- Yerushalmi L, Volesky B: Culture conditions for growth and solvent biosynthesis by a modified *Clostridium acetobutylicum* 513
- Younes G, Breton AM, Guespin-Michel J: Production of extracellular native and foreign proteins by immobilized growing cells of *Myxococcus xanthus* 507

## Applied microbiology

- Annisson G, Couperwhite I: Influence of calcium on alginate production and composition in continuous cultures of *Azotobacter vinelandii* 55
- Bulmer MA, Catley BJ, Kelly PJ: The effect of ammonium ions and pH on the elaboration of the fungal extracellular polysaccharide, pullulan, by *Aureobasidium pullulans* 362
- Caunt P, Chase HA: Degradation of n-valeric acid by alginate-entrapped *Alcaligenes denitrificans* 453
- Efstathiou I, Reyssat G, Truffaut N: A study of inulinase activity in the *Clostridium acetobutylicum* strain ABK8 143
- Eggeling I, Cordes C, Eggeling L, Sahn H: Regulation of acetohydroxy acid synthase in *Corynebacterium glutamicum* during fermentation of  $\alpha$ -ketobutyrate to L-isoleucine 346
- Exterkate FA, de Veer GJCM: Optimal growth of *Streptococcus cremoris* HP in milk is related to  $\beta$ - and  $\alpha$ -casein degradation 471
- Flores N, de Anda R, Guereca L, Cruz N, Antonio S, Balbas P, Bolivar F, Valle F: A new expression vector for the production of fused proteins in *Escherichia coli* 267

- Groeger U, Sahn H: Microbial production of L-leucine from  $\alpha$ -ketoisocaproate by *Corynebacterium glutamicum* 352
- Honda H, Naito H, Taya M, Iijima S, Kobayashi T: Cloning and expression in *Escherichia coli* of a *Thermoanaerobacter cellulosilyticus* gene coding for heat-stable  $\beta$ -glucanase 480
- Jiménez J, Benítez T: Characterization of wine yeasts for ethanol production (Short contribution) 150
- Jüttner F, Hans R: The reducing capacities of cyanobacteria for aldehydes and ketones 52
- Kerby NW, Niven GW, Rowell P, Stewart WDP: Photoproduction of amino acids by mutant strains of  $N_2$ -fixing cyanobacteria 547
- Linton JD, Woodard S, Gouldney DG: The consequence of stimulating glucose dehydrogenase activity by the addition of PQQ on metabolite production by *Agrobacterium radiobacter* NCIB 11883 357
- Lohmeier-Vogel EM, Hahn-Hägerdahl B, Vogel HJ: Phosphorus-31 NMR studies of maltose and glucose metabolism in *Streptococcus lactis* 43
- Meevootisom V, Saunders JR: Cloning and expression of penicillin acylase genes from overproducing strains of *Escherichia coli* and *Bacillus megaterium* 372
- Mullaney EJ, Klich MA: Survey of representative species of *Aspergillus* for regions of DNA homology to *Aspergillus nidulans* developmental genes 476
- Nakahama K, Itoh Y, Fujisawa Y, Kikuchi M: Increased expression of hepatitis B virus surface antigen gene in *Escherichia coli* IS1 insertion 262
- Okamoto H, Kobayashi S, Momma M, Hashimoto H, Hara K, Kainuma K: Isolation and cultivation of a novel microorganism producing a maltopentaose-forming enzyme 137
- Orlowski JH, Barford JP: The mechanism of uptake of multiple sugars by *Saccharomyces cerevisiae* in batch culture under fully aerobic conditions 459
- Pisano MA, Sommer MJ, Lopez MM: Application of pretreatments for the isolation of bioactive actinomycetes from marine sediments 285
- Puc A, Miličić S, Kremser M, Sočić H: Regulation of ergotoxine biosynthesis in *Claviceps purpurea* submerged fermentation 449
- Sawada H, Suzuki T, Akiyama S-I, Nakao Y: Strain improvement of a mildiomycin producer, *Streptoverticillium rimofaciens* B-98891 132
- Schmidt A, Bringer-Meyer S, Poralla K, Sahn H: Effect of alcohols and temperature on the hopanoid content of *Zymomonas mobilis* 32
- Soliveri J, Arias M-E, Laborda F: PA-5 and PA-7, pentaene and heptaene macrolide antibiotics produced by a new isolate of *Streptoverticillium* from Spanish soil 366
- Spencer-Martins I, van Uden N: Substrate and endproduct regulation of cellobiose uptake by *Candida wickerhamii* 272
- Spinnler HE, Bouillanne C, Desmazeaud MJ, Corrieu G: Measurement of the partial pressure of dissolved  $CO_2$  for estimating the concentration of *Streptococcus thermophilus* in coculture with *Lactobacillus bulgaricus* 464
- Straß A, Schink B: Fermentation of polyethylene glycol via acetaldehyde in *Pelobacter venetianus* 37
- Suh DH, Sands JA, Montencourt BS: Temperature sensitive mutant of *Trichoderma reesei* defective in secretion of cellulase 277
- Velati-Bellini A, Pedroni P, Martegani E, Alberghina L: High levels of inducible expression of cloned  $\beta$ -galactosidase of *Kluyveromyces lactis* in *Saccharomyces cerevisiae* 124

## Environmental microbiology

- Al-Shahwani MF, Al-Ghazali MR, Al-Rawi EA: Effect of different pH, temperatures and  $\text{Fe}^{2+}$  concentration on *Sphaerotilus natans* growth and clarity performance index 379
- Apajalahti JHA, Salkinoja-Salonen MS: Degradation of polychlorinated phenols by *Rhodococcus chlorophenolicus* 62
- Cord-Ruwisch R, Widdel F: Corroding iron as a hydrogen source for sulphate reduction in growing cultures of sulphate-reducing bacteria 169
- El-Zanfaly HT, El-Abagy MM: Removal of bacterial indices of pollution during sewage treatment via rotating biological contactor 585
- Gijzen HJ, Zwart KB, van Gelder PT, Vogels GD: Continuous cultivation of rumen microorganisms, a system with possible application to the anaerobic degradation of lignocellulosic waste materials 155
- Kanazawa S, Filip Z: Effects of trichloroethylene, tetrachloroethylene and dichloromethane on enzymatic activities in soil 76
- Knoll G, Winter J: Anaerobic degradation of phenol in sewage sludge. Benzoate formation from phenol and  $\text{CO}_2$  in the presence of hydrogen 384
- Labat M, Garcia JL: Study on the development of methanogenic microflora during anaerobic digestion of sugar beet pulp 163
- Lode A: Changes in the bacterial community after application of oily sludge to soil 295
- MacDonald JC, Bock CA, Slater GP: Evaluation of *Bacillus* as a practical means for degradation of geosmin (Short contribution) 392
- Mason CA, Hamer G, Fleischmann T, Lang C: Aerobic thermophilic biodegradation of microbial cells. Some effects of dissolved oxygen and temperature 568
- Mason CA, Hamer G: Cryptic growth in *Klebsiella pneumoniae* 577

- Omori T, Kimura T, Kodama T: Bacterial cometabolic degradation of chlorinated paraffins 553
- Singh KK, Vincent WS: Clumping characteristics and hydrophobic behaviour of an isolated bacterial strain from sewage sludge (Short contribution) 396
- Tran AV, Chambers RP: Delignification of an unbleached hardwood kraft pulp by *Phanerochaete chrysosporium* 484
- Valo R, Salkinoja-Salonen M: Bioreclamation of chlorophenol-contaminated soil by composting 68
- van den Tweel WJJ, ter Burg N, Kok JB, de Bont JAM: Bioformation of 4-hydroxybenzoate from 4-chlorobenzoate by *Alcaligenes denitrificans* NTB-1 289
- Wyatt JM, Cain RB, Higgins IJ: Formation from synthetic two-stroke lubricants and degradation of 2-ethylhexanol by lakewater bacteria 558

## Rapid communications

- Hockertz S, Plönzig J, Auling G: Impairment of DNA formation is an early event in *Aspergillus niger* under manganese starvation 590
- Parekh SR, Yu S, Wayman M: Adaptation of *Candida shehatae* and *Pichia stipitis* to wood hydrolysates for increased ethanol production 300

## Erratum

- Mozaffar Z, Nakanishi K, Matsuno R: Mechanism of reversible inactivation of immobilized  $\beta$ -galactosidase from *Bacillus circulans* during continuous production of galactooligosaccharides (1986) 25:229-231 594
